RBI PAPER

# Second wave shaved off ₹2 lakh crore output

PRESS TRUST OF INDIA  
Mumbai, June 17

**THE SECOND WAVE** of the coronavirus pandemic in April-May is estimated to have cost the nation ₹2 lakh crore in terms of output, an assessment made by the Reserve Bank of India (RBI) said.

The second wave's toll is mainly in terms of the hit to domestic demand on account of regional and specific con-

tainment rather than a nation-wide lockdown, it said.

“The impact of the second wave is hence estimated at about ₹2 lakh crore of lost 2021-22 output,” said a recent article on the ‘State of Economy’, written by functionaries of the central bank. Moreover, this wave has fanned into smaller cities and villages, sapping rural demand.

The support from government spending may also mod-

erate from the extraordinary expansion undertaken last year, it said. “On the brighter side, several aspects of aggregate supply conditions such as agriculture and contactless services are holding up amidst

pandemic protocols. Industrial production and exports have surged on strong base effects, but there is also evidence of positive momentum,” the authors said. They further said that “at the cost of reiteration, it is vaccination which will shape the recovery”.

The article, published in the RBI's monthly Bulletin, stressed that speed and scale of vaccination against Covid-19 will shape the path of eco-

nomc recovery which has the resilience and the fundamentals to bounce back from the pandemic and unshackle itself from pre-existing cyclical and structural hindrances.

Observing that vaccines by themselves will not end the pandemic, the article said “we have to learn to live with the virus, complementing vaccines with ramping up investment in healthcare, logistics and research”.

## Govt slashes edible oil import tariff value

PRESS TRUST OF INDIA  
New Delhi, June 17

**THE GOVERNMENT HAS** reduced the tariff value for import of edible oil, including palm oil, by up to \$112 per tonne, effective from Thursday, a move which experts said can lead to lower domestic prices.

The Central Board of Indirect Taxes and Customs (CBIC), through a notification, has cut the tariff import value of crude palm oil by \$86 per tonne, and of RBD and crude palmolein by \$112 per tonne each. It also reduced the base import price of crude soyabean oil by \$37 per tonne.

Tax experts said the reduction in tariff value could result in softening of edible oil prices in the domestic market as customs duty payable on the base

**Tax experts said the reduction in tariff value could result in softening of edible oil prices in the domestic market**

import price would come down.

AMRG & Associates senior partner Rajat Mohan said, “The ripple effect of this slashing of base import price could be seen in the retail prices, provided the entire supply chain, including the manufacturers, distributors, and retailers, are ready to pass on this benefit to the ultimate consumer,” Mohan said.

Domestic edible oil prices have more than doubled in the past year. India meets about two-thirds of its edible

oil demand through imports. EY Tax partner Abhishek Jain said tariff value is a deemed value fixed by the government for the purposes of payment of customs duty. This is to say that irrespective of the transaction value, customs duty will have to be paid on the tariff value so fixed.

## CIL to start producing CBM from its Jharkhand block

FE BUREAU  
Kolkata, June 1

**COAL INDIA (CIL)** will start producing coal bed methane (CBM) from its lease hold area under Bharat Coking Coal (BCCL) in Jharkhand. This is the first time the coal miner is producing gas from coal seams, as part of its diversification plans to produce clean energy from coal.

The company has already issued a Letter of Acceptance to a CBM developer, selected through a global bidding process, this month. CIL will be the third company after Great Eastern Energy Corporation (GEECL) and Essar Oil and Gas Exploration and Production (EOGEP) to extract CBM from the coal belts of eastern India.

Until 2015, CIL was only allowed to extract coal from its lease hold area. But the ministry of petroleum and natural gas has allowed the coal miner to extract CBM without alienating lease rights, with a rider

**A CIL executive said the Jharia CBM Block-I will likely come up at an investment of ₹1,880 crore as per the project feasibility report**

to involve only a central or state PSU for exploitation of CBM and that the majority stake be held by CIL.

Central Mine Planning and Design Institute, CIL's consultancy arm, has been involved as the principal implementing agency for the CBM development in its leasehold areas. Around 80% of the CBM bearing areas come under the coal monolith.

A CIL executive said the Jharia CBM Block-I will likely come up at an investment of ₹1,880 crore as per the project feasibility report. While BCCL will be investing 20% of the total capital required, the developer will invest the rest. CIL did

not disclose the name of the developer citing non-disclosure norms, though it said an Indian developer has been awarded the work.

The Jharkhand CBM block-I has a resource base of over 2.6 billion cubic metres (BCM) spread over an area of 27 sq km. Average production capacity has been pegged at 1.3 million metric standard cubic metres per day once the commercial operation kick-starts from 2026. The life span of this methane extraction project has been estimated to be over 25 years, the executive said.

The miner has also floated two global tenders this month to look for developers for two more CBM projects with a combined resource potential of 2.7 BCM. A block at Ranigunj under Eastern Coalfields in West Bengal has 2.2 BCM resource while Sohagpur CBM Block under South Eastern Coalfields in Chattisgarh has 500 million cubic metres resource of methane.

## Sugar output up 13% till June 15

PRESS TRUST OF INDIA  
New Delhi, June 17

**INDIA'S SUGAR PRODUCTION** rose 13% till June 15 in the 2020-21 marketing year at 306.65 lakh tonne on higher sugarcane production, according to trade data, the sugar marketing year runs from October to September.

“Sugar mills across the country have produced 306.65 lakh tonne of sugar between October 1, 2020 and June 15, 2021. This is 35.54 lakh tonne higher than 271.11 lakh tonne produced at the same time last year,” Indian Sugar Mills Association (ISMA) said in a state-

ment. Only five mills are currently operating.

In Uttar Pradesh, sugar production stood at 110.61 lakh tonne till June 15 as against 126.30 lakh tonne in the corresponding period of the previous year. Sugar output in Maharashtra rose to 106.28 lakh tonne from 61.69 lakh tonne during the period under review. In Karnataka, produc-

tion increased to 41.67 lakh tonne from 33.80 lakh tonne.

As per port information and market reports, ISMA said mills have contracted for 58 lakh tonne of export of sugar so far against the government quota of 60 lakh tonne for 2020-21. Of this, about 45.74 lakh tonne have been physically exported out of the country. It is also reported that another 5-6 lakh tonne of sugar is in pipeline to be physically exported in June. In addition, the sugar industry had exported 4.49 lakh tonne of sugar in Oct-Dec 2020 quarter against the export quota of the 2019-20 marketing year.
